COMMUNIQUE

SEED POTATOES FOR 2026 & 2027

The **Agricultural Marketing Board (AMB)** wishes to inform all potato growers and the public in general that its stock of seed potatoes for the Potato Campaign 2026 has been fully exhausted.

There is presently no remaining saleable stock of seed potatoes for Campaign 2026.

The AMB remains committed to ensuring the timely availability of quality seed potatoes to support local production and national food security. Procurement quantities are planned taking into consideration growers' requirements, anticipated cultivation areas and prevailing market conditions.

REGISTRATION FOR POTATO CAMPAIGN 2027

The AMB wishes to inform all potato growers, including individual growers, cooperatives and corporate growers, that registration for the Potato Campaign 2027 has started today, 10 November 2026, and will close on 4 December 2026.

All interested growers are invited to register their requirements within the stipulated period to enable the AMB to assess national demand and plan its procurement of seed potatoes accordingly.

During registration, growers are requested to indicate:

- the quantity of seed potatoes required;
- the preferred variety/varieties;
- the intended area to be planted; and
- the anticipated timing of uplift.

Timely registration is essential to facilitate proper procurement planning, ensure the availability of adequate quantities and appropriate varieties, and minimise the risks of shortages or excess stocks.

The AMB therefore counts on the collaboration of all potato growers to communicate their requirements within the registration period and to honour their confirmed orders.

Further information regarding the registration procedure and applicable terms and conditions may be obtained from the **SEEDS UNIT**, Agricultural Marketing Board.
